

Leo Carrillo State Park

Our Mission

The mission of the California Department of Parks and Recreation is to provide for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation.

California State Parks supports equal access. Prior to arrival, visitors with disabilities who need assistance should contact the park at (310) 457-8143. This publication is available in alternate formats by contacting:

*Leo Carrillo State
Park is an inviting
treasure trove of
tide pools, offshore
reefs, canyon streams
and challenging
backcountry.*

Leo Carrillo State Park—an inviting treasure trove of tide pools, offshore reefs, canyon streams and challenging backcountry—is located in the Santa Monica Mountains 35 miles northwest of Santa Monica. Its variety of recreational activities is limited only by the visitor's imagination. From traditional beach recreation like sunbathing, fishing, whale watching and swimming to more strenuous pastimes such as surfing, hiking, diving, windsurfing, kayaking and camping, Leo Carrillo is a haven for adventurers.

Leo Carrillo

WHO WAS LEO CARRILLO?

Leo Carrillo State Park is named after a star of Broadway, television and film. Descended from prominent early California families—his great-grandfather was Carlos Antonio de Jesus Carrillo, a governor of California in the last years of Mexican rule—Mr. Carrillo's talent lay in entertainment. He began as a vaudeville comedian; his prolific film career lasted from the late 1920s well into the 1960s. One of his more recognizable roles was the comic sidekick in the television series

“The Cisco Kid.” Leo Carrillo served 14 years on the State Beaches and Parks Commission; he was instrumental in the state's acquisition of much of the property between Malibu Lagoon and Point Mugu, including the area named after him.

PARK HISTORY

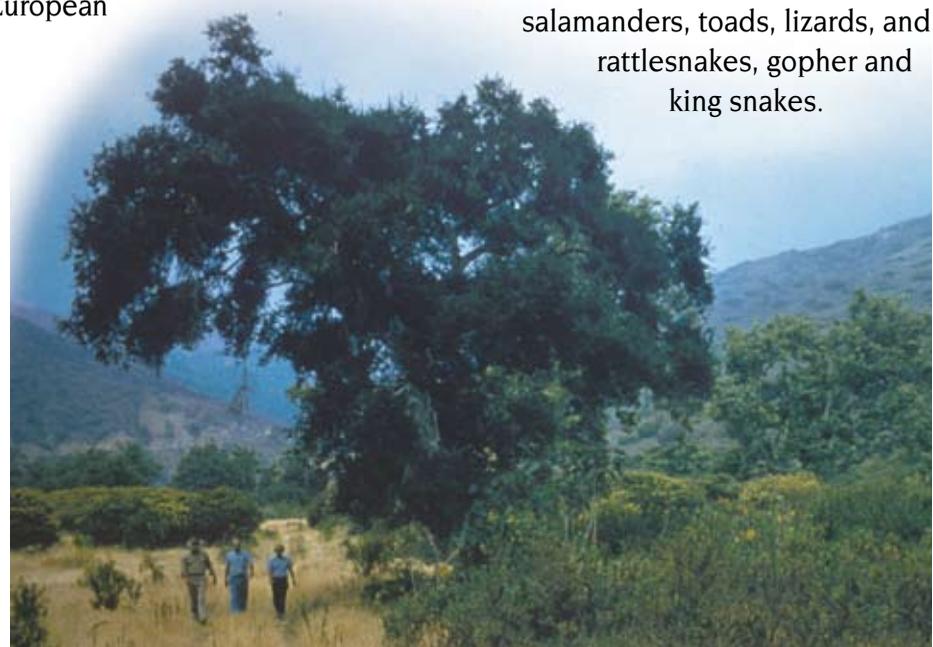

Archaeologists believe that the Chumash people, superb artisans who excelled at basketry and elaborate rock art, lived in the area as long ago as 6,000 B.C.E. They enjoyed playing games, singing, dancing and trading with other tribes. Their plank boats carried them to the Channel Islands to trade, fish and gather mussels and abalone. In the late 1700s, Spaniards settled the area, forcing dramatic changes on the Chumash and their way of life. Native American labor built Mission San Buenaventura, but the regimented mission life and the effects of European diseases took a toll on the Chumash. After inhabiting this land for thousands of years, they had nearly disappeared by 1920. Today many Chumash descendants still celebrate and share their vibrant cultural traditions.

THE LAND

The Mediterranean climate and varied topography support

chaparral, coastal sage scrub, riparian woodland, wildflowers and coastal strand plant communities. Higher inland regions support dense brush, fire-adapted chaparral species such as chamise, manzanita, ceanothus and scrub oak. Lower elevations are home to the sage scrub plant community—prickly pear cactus, buckwheat, giant coreopsis, California sagebrush and bush sunflower. Riparian plant communities—California bay, willow, black walnut and sycamore trees—grow in the cool, moist environment along Arroyo Sequit.

Rabbits, bobcats and coyotes thrive here, along with squirrels and scrub jays. Hikers often see acorn woodpeckers, horned owls, quail, warblers and red-tailed hawks. Mule deer, gray foxes and raccoons forage in the riparian woodland at night. Amphibians and reptiles include salamanders, toads, lizards, and rattlesnakes, gopher and king snakes.

Oak-dotted meadows and trails

Small coves await discovery.

THE SEA

Small beach coves in this year-round paradise offer privacy and ocean access for anglers, divers, surfers, wildlife watchers and beach walkers.

Tide pools—During seasonal low tides, visitors may see sea stars, anemones, mussels, crabs and other tide pool creatures. Tide pool animals are fragile and need your help to protect them. Touch animals gently and leave them where you find them. Picking up animals may injure them. Leave shells as future homes for hermit crabs.

Marine mammals—Gray whales migrating down the coast venture in close to the beach. In April and May, gray whales may be seen from the beach as mothers (cows) and babies (calves) return north. Dolphins, harbor seals and sea lions can also be seen swimming along the beach.

Sea birds—Pelicans, gulls, grebes and cormorants glide overhead. Many species

of gulls and shorebirds feed along the shoreline while other birds fish in the waters offshore. Pelicans and cormorants are commonly seen resting on rocky outcroppings.

Fishing—Anglers over age 16 need a valid California fishing license to fish for kelp (calico) bass, surf perch, sheephead, halibut and white sea bass.

Diving—The clear waters of the park are good for scuba diving and snorkeling. Dive with the proper certification, equipment and training, and never dive alone. Ask a lifeguard about ocean conditions and the best diving areas.

Surfing—Swim and surf only in areas with lifeguards, and go with a friend. Sequit Point and nearby Staircase and County Line beaches are especially popular. Swimming, boogie boarding and sunbathing are also favorite activities. Know your limits and learn about weather and ocean conditions. If you get caught in a rip current that causes you to drift from shore, do not swim against it. Instead, swim parallel to the shore until you are out of the current, then swim back towards shore.

Pelicans and cormorant

OTHER RECREATIONAL ACTIVITIES

Hiking

Hikers have a choice of gentle or more energetic walks. Yellow Hill Fire Trail offers panoramic views of the beach; on a clear day, you can see Anacapa, Santa Catalina and Santa Cruz, three of the Channel Islands in the distance out at sea. The steeper Nicholas Flat Trail meanders through wildflowers and various plant communities to a seasonal pond. A short nature trail loops near the campfire center at the rear of Canyon Campground.

Camping

The Canyon Campground has 135 family sites, each with a table and fire ring. Restrooms and coin-operated hot showers are nearby. Hike-and-bike campsites are located near campsite #1. The Group Campground at the back of the canyon accommodates up to 50 people. It has picnic tables, two barbecue pits, and restrooms with coin-operated hot showers. Camping reservations are recommended from May through October and on holiday weekends. To make camping reservations, call (800) 444-7275.

Interpretive Programs

Campfires, Junior Ranger programs and nature walks are offered from Memorial Day through Labor Day. A small visitor center is open on the weekends. School field trips must have reservations. For information, call (805) 488-1827.

ACCESSIBLE FEATURES &

Seven campsites are accessible, with restrooms and showers that are generally accessible. Accessible picnicking, parking and restrooms are available at North Beach. Beach wheelchairs may be checked out at both North and South Beach. Accessibility is continually improving; call the park or see <http://access.parks.ca.gov> for more details.

PLEASE REMEMBER

- Watch out for rattlesnakes, ticks and poison oak, and stay away from seals and sea lions.
- Stay on the trails and carry plenty of drinking water.
- Use caution when fishing from slippery rocks during a rising tide or big surf.
- Ask the lifeguard or park ranger about ocean conditions.
- Only vehicles with less than eight-foot clearance can enter the North Beach parking lot.

NEARBY STATE PARKS

- Point Mugu State Park, 15 miles south of Oxnard on Hwy. 1 (310) 457-8143
- Robert H. Meyer Memorial State Beach, 10 miles north of Malibu on Hwy. 1 (310) 457-8143
